PATO

100% recycled 100% recyclable

The Pato series was introduced in 2013 and has since grown to become one of Fredericia's most comprehensive furniture collections. By integrating recycled polypropylene plastic (PP) into our existing portfolio of products, we are taking further steps to help protect the environment. While at the same time, ensuring the continuity of design.

Pato has always been made from recyclable PP, which is pure and free from any additives. By adding upcycled plastic waste while keeping the design recyclable in the future, we follow our CSR strategy to minimise our environmental footprint and contribute to the circular economy.

100% RECYCLED

Minimize waste

We minimize waste from the commercial and the industrial sectors by using upcycled plastic from two sources.

Post-industrial recycled PP

This is plastic waste from the production of other polypropylene products which has been collected and reprocessed for reuse, which makes a zero-waste production line.

Post-consumer recycled PP

This is used plastic from commercial products, which has been sorted and reclaimed. Typically from household waste such as yogurt container and medicine bottles or from other sources such as discarded fishing nets.

Ready for the future

The final material for Pato is a mix of the softer post-consumer PP and the more rigid and durable post-industrial PP. Making each chair both recyclable and durable in use.

Designed for disassembly

Pato is an eco-intelligent collection of multi-purpose chairs comprised of pure recycled polypropyleneplastic (PP). Consequently, every chair in the series can be recycled endlessly.
